

# Color Armor

## Why Color Armor?

- Combines the decorative appeal of metal with the strength and functionality of polycarbonate
- Perfectly matches the roof material, texture, and color
- Lasts the entire life of the roof
- Ages the same as the roof for a permanent match
- Attaches adhesively, mechanically or fastens to the rib
- Will not rust, streak, or stain the roof

Color Armor is our patent-pending snow guard cover that is made from the exact same material as the roof. It allows you to cover a functional polycarbonate snow guard with an attractive outer shell that perfectly matches the roof material, texture, and color. Color Armor weathers at the same rate as the roof which provides a perfect match forever. This exclusive technology gives you the ability to take advantage of the benefits of both styles of snow guards. This product combined with the polycarbonate base of either the Rib Guard or Panel Guard gives you all the strength, size, and functionality that you look for in a polycarbonate snow guard and adds an easy snap-on cover to give you the striking look of metal that will last for the life of the roof. Color Armor can be made from virtually any metal roofing material and in any color. It is available in copper, lead coated copper, zinc, steel, aluminum, galvalume, and in many more options.

Color Armor is our unique, patent-pending snow guard cover that is made from the exact same material as the roof. This new product gives you the ability to cover polycarbonate snow stops with an attractive outer shell that matches the roofs color. Color Armor can be made from virtually any metal roofing material and powder coated in any color for a flawless match that lasts the lifetime of the roof
