

Panel Guard

The Sno Shield Panel Guard is an adhesive plastic snow guard. Its unique design makes it attractive and functional. Built from tough, transparent polycarbonate, the Panel Guard is the perfect plastic snow guard to blend in with any roof. The wide, Y-shaped base makes it very effective at stopping snow and the drain allows the snow to melt off naturally. The Sure Grip base enhances the bonding strength of this plastic snow guard to ensure a stronger hold to the roof. Available for all roofing applications including metal, slate, shingles, and shakes. Customize the Panel Guard with our Color Armor for a perfect match to any roof.

- Made from durable, virgin grade, UV stabilized polycarbonate
- Clear polycarbonate blends in with the roof
- Attractive design for enhanced aesthetics
- Sure Grip base for increased bonding strength
- 5.5 inch wide base and 4 inch height for more stopping power
- Can be adhesively attached, mechanically fastened or both
- Y-shaped design for more effective collection of snow
- Predrilled holes for quick and easy mechanical fastening

If you need clear polycarbonate snow guards for metal roofing that can be attached adhesively or mechanically, our Panel Guard is a first-class snow retention product. The Panel Guard is made of durable, transparent, UV-stabilized, polycarbonate. It features an attractive design that will enhance the beauty of any roof, a broad span for greater snow stopping ability, and a Sure Grip base that increases its ability to bond to the roof.
